Art Unit: 1724

Upon reconsideration, the restriction requirement contained in the previous Office action is hereby modified as follows:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, 19-33, 46 and 47, drawn to a cartridge and apparatus for purifying a liquid chemical, classified in class 210, subclass 282.
- II. Claims 15-18 and 34-37, drawn to a method for purifying a liquid, classified in class 210, subclass 663.
- III. Claims 38-45, drawn to a detachable fitting, classified in class 285, subclass 120.1+.

The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of group I could be used in another process, different from that of group II. For example, this device could be used to purify a fluid (e.g. a gas) other than a liquid.

Inventions I and III are independent and distinct from one another because the cartridge and apparatus of Group I does not

Art Unit: 1724

require the detachable fitting of Group II; and the detachable fitting of Group II does not require the packed section of purification material of Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the searches for the individual Groups are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Furthermore, the election of species requirement contained in the previous Office action is maintained. Applicant's response to said previous Office action (i.e. filed October 9, 2002) contains the following elections of species:

- (1) hydrogen peroxide as the **chemical purified** species;
- (2) a combination of anionic contaminant and cationic contaminant as the **contaminant removed** species; and
- (3) a combination of a first cartridge comprising an organic contaminant-reducing purification cartridge, a second cartridge comprising an anionic contaminant-reducing purification material,

Art Unit: 1724

and a third cartridge comprising a cationic contaminant-reducing purification material as the **purification material** species.

Unless Applicant's response to this Office action contains instructions to the contrary, the above noted elections of species will remain in effect.
